

David A. Nielsen, Ph.D.
**Associate Professor, Psychiatry & Behavioral Sciences and
Pharmacology & Chemical Biology**
Director of the Toomim Laboratory for Psychiatric Genetics
Baylor College of Medicine
nielsen@bcm.edu

Research Interests: Elucidating the genetic and epigenetic mechanisms involved in determining response to pharmacotherapy and vulnerability to drug addiction, impulsivity, and other psychiatric disorders

Strengths or unique resources: Experienced in genetic and epigenetic analysis of substance abuse disorders

Type of collaborator you seek: Clinical investigators working on human models of opioid analgesic tolerance or reward mechanisms, or neonatal abstinence syndrome
