

GCC Immunology Bimonthly Seminar-Tuesdays 12-1, 1st and 3rd Tuesdays

Date	Speaker 1	Speaker 2	Topic	Presentation Title Speaker 1	Presentation Title Speaker 2
10/4/22	Michael Curran (MDACC)	Vanaja Konduri	Cancer Immunotherapy	Functionally Repolarizing Myeloid Stroma with Synthetic STING Agonists Drives Immune Clearance of Glioblastoma	Dendritic Cell Derived CTLA4: Implications for Cancer Immunotherapy
10/18/22	Yingzi Cong (UTMB)	Jill Weatherhead (BCM)	Immunology of Infectious diseases	STING Regulation of Host-microbiota Interaction and Intestinal Homeostasis	Host Gastric Environment Permits Ascaris Egg Hatching and Infection
11/1/22	Sanjiv Sur (BCM)	Christine Beeton (BCM)	Inflammatory diseases/Translational immunological Research	Role of DNA Base Excision Repair Enzyme NEIL2 in Regulating Allergic Airway Inflammation	Bioengineered Probiotics for the Oral Delivery of Immunomodulators
11/15/22	Xiaoyi Yuan (UTHSC)	Antony Rodriguez (BCM)	MicroRNA Control of Immunity		Let-7 Serves as a Driver of Lung IL17-Mediated Inflammation and COPD
12/6/22	Roza Nurieva (MDACC)	Will Decker (BCM)	T cells/B cells and antibodies		
1/17/23	Navin Varadarajan (UH)	Nancy Huang (TAMU)	Molecular Immunology		Optogenetic Engineering of STING Signaling to Remotely Control Anti-tumor Immunity
