

Andrew Shepherd. Ph.D., Assistant Professor

Department of Symptom Research, Division of Internal Medicine, UT MD Anderson Cancer Center

Email Address: ajshepherd@mdanderson.org

Research Interests: chronic pain, neuro-immune crosstalk, cancer pain, neuropathy

Our lab has diverse expertise in rodent behavior testing, immunohistology and cell biology, and we pride ourselves on training people to think in multidisciplinary ways, a concept at the core of neuroimmunology. We have our own mouse behavioral testing equipment, histology facilities and confocal microscope, meaning that trainees can expect to develop expertise in multiple domains during their time in our group.
